ABOUT PINGSECURE

Integrated technology for secure and connected environments

Pingsecure LLC is a UAE-based technology integrator delivering intelligent ELV, AV, IT and security solutions for commercial, residential and industrial environments.

We work closely with end users, fit-out contractors, consultants and architects to develop technically robust solutions that complement the design intent of each space while addressing applicable local authority requirements. Our systems are discreetly integrated into the surrounding architecture, preserving the intended look and feel while providing the functionality, reliability and ease of use each project demands.

When a brief includes an unusual requirement, our first response is to explore how it can be achieved. Rather than defaulting to conventional answers, our team works collaboratively to find a practical and technically sound solution that supports the client's vision without compromising performance, quality or maintainability.

OUR MISSION

To deliver smart, innovative and reliable solutions that help clients operate efficiently, communicate clearly and stay protected.

OUR VISION

To become the trusted integration partner for future-ready environments across the UAE and the wider region.

WHY CLIENTS CHOOSE US

End-to-end solution delivery

Tailored design and installation

Reliable support and maintenance

Scalable systems for long-term growth

UAE-Focused

Multi-Sector Expertise

Certified Team

Future-Ready Approach

OUR SOLUTIONS

Integrated systems designed for performance, protection and control

Pingsecure combines physical security, audio-visual systems, smart automation and IT infrastructure within one coordinated technology environment. Each solution is planned around site conditions, user journeys, compliance requirements and long-term operational value.

CCTV Systems

24-hour visibility and remote monitoring

Access Control Systems

Secure entry management for people and assets

Audio Visual Solutions

Immersive displays and communication systems

Meeting Room Solutions

Smarter collaboration for modern teams

Smart Home Automation

Centralized control for comfort and convenience

Network Infrastructure Setup

Reliable connectivity built for scale

Cyber Security

Protection for networks, devices and data

Datacentre Solutions

Robust infrastructure for uptime and resilience

DELIVERY MODEL

Discover

Understand requirements, site conditions and operational priorities.

Design

Create a clear architecture for systems, users and workflows.

Deploy

Install, configure and test the complete integrated environment.

Support

Maintain performance with responsive technical care.

SECURITY AND SMART CONTROL

Intelligent systems that protect people, property and operations

CCTV Systems

High-clarity surveillance with remote access and event alerts

Access Control Systems

Card, biometric and mobile credentials for secure entry

Speed Gates and Turnstiles

Controlled movement for offices and secure facilities

Lighting Control Systems

Flexible scene control for comfort, efficiency and ambience

Smart AI Solutions

Analytics driven automation for visibility and faster response

Monitoring and Alert Management

Actionable notifications and centralized oversight

Remote Access

Event Alerts

Managed Entry

AUDIO-VISUAL AND SMART WORKPLACE

Collaborative environments built for clarity, engagement and control

Audio-Visual Systems

Integrated displays, sound and control for modern spaces

Video Wall Solutions

Large-format visual impact for command, retail and presentation environments.

Meeting Room Solutions

Purpose-built rooms for seamless in-person and virtual collaboration.

Smart Workplace Solutions

Connected systems that improve comfort, productivity and experience

PABX Systems

Reliable business communication with clear voice connectivity

Home Theatre and Media Rooms

Immersive entertainment spaces with refined smart control

**Clear Communication.
Immersive Displays.
Smooth Collaboration.**

IT INFRASTRUCTURE AND CYBER SECURITY

Reliable foundations for secure and scalable digital operations

NETWORK INFRASTRUCTURE SETUP

Stable and scalable connectivity designed for performance

Datacentre Solutions

High-availability environments for critical systems and workloads.

Cyber Security

Protection for data, devices and networks through layered defense

System Integration

Connected platforms that work together with clarity and control

Maintenance and Support

Responsive technical support to keep systems running smoothly

Future-Ready Architecture

Technology planning that supports growth and long-term value.

SMART AUTOMATION AND EXPERIENCE

Connected living and working spaces designed around comfort and control

Smart Home Automation

Centralized control for lighting, climate, security and entertainment

Lighting Scenes

Elegant mood control for homes, offices and hospitality spaces

Climate Control

Comfort-focused temperature and air-quality management

Curtain and Shade Control

Motorized shading for privacy, comfort and energy performance

Environmental Sensors

Water, smoke, gas and presence sensing for proactive response

App-Based Control

Simple dashboards that bring systems together in one view

Designed for ease of use, daily comfort and reliable control across villas, offices, hospitality spaces and modern facilities.

INDUSTRIES WE SERVE

Tailored solutions for diverse environments and operational needs
